13. Who expresses she uses technology to be in touch with the people she loves?	A	B	C

## Test 2 Reading and Writing Part 2

Luna

Hi, I am Luna and this is my website, "Have Fun!" I am from Colorado, and I am 18. I am a university student. I love computers and technology, so I am majoring in Computing – I will be an engineer. I have lots of hobbies, but my favourite one is... going for a swim every Saturday, yes, definitely! There are several water parks in the state, so I can visit a different one every week. The best part is when we organize competitions to see who can jump into the pools from the highest point! It feels like flying. I also love making new friends.

What about you?

Zyndy

Hey! Welcome to my site, "Adventure!" I am Zyndy from Monterrey, Mexico. I am 20 years old. My dad is a pilot major, he's very good at flying big planes and I love flying too, so I am studying at the Air University. I spend most of my time using my computer because doing research is very important in my studies. Another thing I do very often is swim, I like swimming, but it's not something I'd do for fun, you know... my studying is time demanding. In my spare time, I call my friends and we organize outings or gatherings at someone's home, so we can have fun together.

Norma

Howdy, all!!! Welcome to my page, "All out there!" I am Norma and I am 21 years old. I live in Australia, but I am Canadian. My parents are professional swimmers and my brother is a pilot. I got a totally different life track from theirs, I am an actress, a singer and a guitar player. Last year, I took the role of a swimmer in a TV show. This swimmer was great because she was the best, the only part I found a little difficult was when I had to stand at very high points, pretending I would jump into a pool – fortunately, I never had to do it. I hope my parents never ask me to do that when I go with them to their training sessions. My brother is still a university student, he studies in an Aviation University in the US. I don't see him very often, but we always use our computers or cellphones to have video calls, when we do that, we chat for hours!
