

UNIT 3 Comparing fractions

TAKE THE CHALLENGE

Read and answer the question.

Dana is making shorts for her son's soccer team. Yesterday, she used $\frac{4}{6}$ m of cloth and today she used $\frac{3}{5}$. When did she use more cloth?

Explain what you did to find the answer:

.....

.....

.....

.....

.....

Read and complete.

Equivalent fractions are fractions that have the same value, but they are written differently.

$$\frac{1}{2} = \frac{2}{4} = \frac{4}{8}$$

You can also use pictures to represent them.
