

You will watch a video “Let's create a world that runs entirely on green energy”, listen carefully and complete the text.

Home. It's not what we think it is. It's not just _____ wood, or concrete or bricks. Because it's not _____ a house, let alone a village, or a city, or a country. Our home is _____. You _____ not have _____ all its rooms, its passages, wandered its many gardens, bathed in its waters, looked _____ from the very top floor, nor met all those you live with. This is Latifa by the way. It's still your home, still mine, still theirs. It's provided all of us with the sustenance and shelter we need to grow and prosper. Our home has _____ us well. But as temperatures increase and sea levels rise, it's time to change the way we treat it. It's not easy to change our ways, but if we all look _____ our own walls and see our home for what it really is, it _____ change you...
