

Read, listen and complete.

Exercise 1: Complete the paragraph.

Okay, so today, we're talk about learning. In my opinion this is a really important to	pic
because we try to learn new things in life. So, first why don't	we
learning in school. The first place that you think of when y	/ou
think of learning is school. In the U.S., people usually start their first year of school when they	y're
between four and six years old. From, they have ma	any
classes and study many subjects until they finish high school. And then of course, they can go) to
college if they want. So, in total, this is learning. But	do
students really learn a lot during their education? I think it depends. Sometimes you learn a lot	t in
your class, and sometimes you don't learn much at all. I'm sure a lot of you	
this experience before. You take a class in high school, and you're	
learn that subject, but you don't remember much from that class when it's over.	

Exercise 2: Match to create complete ideas. There is an extra option that you will not use.

a) It was strange because most of other classmates hated this class. 2. For example, in 7th grade, I had an English class that I loved. () () () () () () () (
2. For example, in 7th grade, I had an English class that I loved. () C) This is important because if we don't continue learning, we can't stay up to date. d) Well, one way is to take courses to learn skills and get certifications. 4. But we don't only learn in school; we have to learn throughout our career. () So, what are some things that could be useful to learn?	1. However, when I had classes that I was	a) It was strange because most of other
c) This is important because if we don't continue learning, we can't stay up to date. 3. I think this shows that our brain can learn a lot if it's engaged, 4. But we don't only learn in school; we have to learn throughout our career. () 5. So, how can we continue learning if we're	interested in, ()	classmates hated this class.
c) This is important because if we don't continue learning, we can't stay up to date. 3. I think this shows that our brain can learn a lot if it's engaged, () skills and get certifications. 4. But we don't only learn in school; we have to learn throughout our career. () but it won't learn if it's not engaged. f) So, what are some things that could be useful to learn? 5. So, how can we continue learning if we're	2. For example, in 7 th grade, I had an	b) I actually learned a lot.
continue learning, we can't stay up to date. 3. I think this shows that our brain can learn a lot if it's engaged, () 4. But we don't only learn in school; we have to learn throughout our career. () () () () () () () (English class that I loved.	c) This is important because if we don't
 d) Well, one way is to take courses to learn a lot if it's engaged, 4. But we don't only learn in school; we have to learn throughout our career. f) So, what are some things that could be useful to learn? 5. So, how can we continue learning if we're 	()	continue learning, we can't stay up to date.
 4. But we don't only learn in school; we have to learn throughout our career. () 5. So, how can we continue learning if we're e) but it won't learn if it's not engaged. f) So, what are some things that could be useful to learn? 		d) Well, one way is to take courses to learn
have to learn throughout our career. f) So, what are some things that could be useful to learn? 5. So, how can we continue learning if we're	a lot if it's engaged, ()	skills and get certifications.
f) So, what are some things that could be useful to learn? 5. So, how can we continue learning if we're		e) but it won't learn if it's not engaged.
useful to learn? 5. So, how can we continue learning if we're	have to learn throughout our career.	6) Co what are some things that sould be
