How would you think other people see you? They see me a _____ differently I think than I do. They see me a little more confident that I feel inside. But _____ , no, I think they see me as a very sincere, trustworthy person.

Exercise 2 – There are 6 sequenced sentences in this text. Listen to the audio – find and underline them.

Angelique

Um, I would say talkative, not shy, optimistic. I try to be optimistic. I think, I think that's probably what comes off the most, is that I smile all the time. I try to, and it just helps, makes your happier anyway, so, yeah! I'm very sarcastic and sometimes I can be introverted, I'm generally a happy person. I try to stay upbeat and not let that much get me down, and I'm very talkative. I think I have a lot of qualities that an outgoing person would have, I like to meet new people. I love the city because you get to meet so many new people. Just walking down the street you meet new people and friends, and things like that, but I also have qualities that maybe a shy person would have. So, yeah, pretty outgoing in general.

And do you think other people see you that way too?

Sometimes it depends on the environment, Yeah! I really do. I probably see myself a little bit differently than other people see me, but only in terms of, sometimes I'm off the wall, 'cause I know my full self, and people just see what they see, you know. But I think it's generally outgoing is what everybody would say.
