Unit 1

Numbers to 100.....	Page 5
Place value.....	Page 9
Numbers to 200.....	Page 15
Numbers to 999.....	Page 20

Unit 2

Subtraction.....	Page 30
Subtracting (tens).....	Page 32
Subtracting (tens – units).....	Page 34
Subtracting (tens / units – tens).....	Page 35
Grouping and multiplying.....	Page 38
Making groups.....	Page 38
Multiplications.....	Page 40
Array.....	Page 43
Multiplication (1 and 0).....	Page 45
Let's check out.....	Page 47
Adding.....	Page 47

Multiplication (2 and 4 times table).....	Page 49
Multiplication (3 times table)	Page 50
Multiplication (5 and 10 times table).....	Page 51

Unit 3

Functions and equations – addition and subtraction.....	Page 53
Multiplication tables.....	Page 55
Equalities and inequalities.....	Page 56
Function machines.....	Page 59
Fractions.....	Page 62
Halves of amounts.....	Page 64
Number tracks.....	Page 68
Time - o'clock.....	Page 71
Half past.....	Page 72
Quarters.....	Page 74

Unit 4

Shapes	Page 77
Solid shapes.....	Page 80
Comparing and ordering to 999.....	Page 84
Adding and subtracting – 999.....	Page 87
Word problems – multiplication.....	Page 90

Draw lines to match the numbers with the words.

- | | | | |
|----|---|---|--------------|
| 99 | • | • | fifty-eight |
| 50 | • | • | thirty-three |
| 45 | • | • | ninety-nine |
| 33 | • | • | eighty-eight |
| 67 | • | • | forty-five |
| 11 | • | • | fifty |
| 58 | • | • | sixty-seven |
| 88 | • | • | eleven |

Find the missing numbers.

51		53		55		57		59	60
----	--	----	--	----	--	----	--	----	----

61	62		64		66		68		70
----	----	--	----	--	----	--	----	--	----

71		73		75		77			80
----	--	----	--	----	--	----	--	--	----

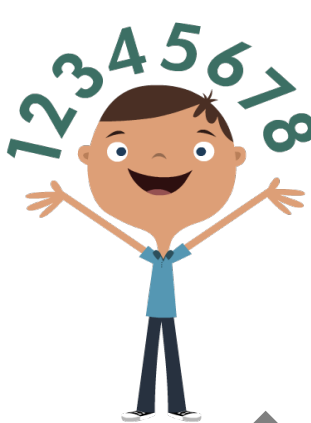

81			84		86		88		90
----	--	--	----	--	----	--	----	--	----

91		93		95		97			100
----	--	----	--	----	--	----	--	--	-----

Put the sets of numbers in order.

48	50	23		23	48	50
27	19	31	
64	87	78	
52	35	42	
30	21	19	
84	92	73	

Write the numbers that come before and after.

What comes before?

<input type="text"/>	←	91
<input type="text"/>	←	34
<input type="text"/>	←	63
<input type="text"/>	←	20
<input type="text"/>	←	87

What comes after?

26	→	<input type="text"/>
89	→	<input type="text"/>
98	→	<input type="text"/>
36	→	<input type="text"/>
18	→	<input type="text"/>

You're up!

Look and write numbers or words.

10	_____	15	five
_____	twenty	_____	_____
40	thirty	35	twenty five
_____	_____	_____	_____
60	fifty	65	forty five
_____	seventy	_____	fifty five
90	eighty	95	seventy five
_____	one hundred	_____	eighty five
_____	_____	_____	_____

Read and choose the correct number.

- 78 12 68 39 100 52

1. What number comes before forty?
2. What number comes after fifty-one?
3. What number comes before thirteen?
4. What number comes after seventy-seven?
5. What number comes before sixty-nine?
6. What number comes after ninety-nine?

Place value

TAKE THE CHALLENGE

Read and write a letter on each line.

- a) 920
- c) 985

- b) 101
- d) 546

This number has a four in the tens place. It has a six in the ones place and a five in the hundreds place.

.....

This number has a one in the hundreds place. It has a zero in the tens place and a one in the ones place.

.....

This number has a zero in the ones place. It has a nine in the hundreds place and a two in the tens place.

.....

This number has an eight in the tens place. It has a five in the ones place and a nine in the hundreds place.

.....

Read and look.

Numbers can represent different amounts when they appear in different places or forms.

6 tens

+

4

=

ones
 $60 + 4 = 64$

10	20	30	40	50	60	
9	19	29	39	49	59	
8	18	28	38	48	58	
7	17	27	37	47	57	
6	16	26	36	46	56	
5	15	25	35	45	55	
4	14	24	34	44	54	64
3	13	23	33	43	53	63
2	12	22	32	42	52	62
1	11	21	31	41	51	61

6 4

Look and count. Then write the numbers.

• Look and
Colour to illustrate the numbers.

45

97

36

36

78

Look and write what tens and ones numbers make the totals.

tens 10's ↓ 2		ones 1's ↓ 0
+		5
2		5

.... tens and ones = 41

..... tens and ones = 17

..... tens and ones = 55

..... tens and ones = 62

..... tens and ones = 83

..... tens and ones = 28

Look and write what numbers the tens and the ones make.

5 tens and 7 ones make the number

8 tens and 2 ones make the number

2 tens and 9 ones make the number

4 tens and 3 ones make the number

6 tens and 6 ones make the number

Write the number before and after the number given.

	22	
--	----	--

	11	
--	----	--

	15	
--	----	--

	19	
--	----	--

	20	
--	----	--

	27	
--	----	--

	17	
--	----	--

	21	
--	----	--

Find the value of each shape.

 = 13  _____

 = 15  _____

 = 17  _____

You're up!

Read the definitions and write the words.

1.

It is the system in which the position of a digit in a number determines its value.

2.

It is the place two to the left of the decimal point in a number.

3.

If you have a three-digit number, it has the first place.

4.

It is the amount you get when several smaller amounts are added together.

5.

It is the particular form or appearance of something – they are called geometrical bodies.

Look and write what the blocks are examples of.

Numbers to 200

TAKE THE CHALLENGE

Read and answer the question.

Maria is a dancing teacher. She helps people who can't dance very well.

Every week, she receives \$10 from each of her students.

Last week, she had 5 students. This week, 4 students joined the lessons, and 1 student cancelled his lessons.

How much money did Maria earn last week and this week together?

Look at the boxes, count and write.

What number is it?

_____ =

Look, count and write the numbers as words.

1. _____.

2. _____.

3. _____.

Look and expand the numbers.

a) $147 = 100 + 40 + 7$

b) $161 = \dots\dots\dots$

c) $129 = \dots\dots\dots$

d) $198 = \dots\dots\dots$

e) $153 = \dots\dots\dots$

f) $182 = \dots\dots\dots$

g) $142 = \dots\dots\dots$

Read and circle the correct number in each set.

$100 + 80 + 3$

138 133 183

$100 + 60 + 2$

126 162 166

$100 + 20 + 8$

182 128 122

$100 + 90 + 1$

191 119 111

$100 + 60 + 3$

163 136 133

$100 + 40 + 5$

154 155 145

Read and colour the box that shows the correct answer.

1 hundreds, 5 tens and 3 ones

135

193

153

1 hundreds, 2 tens and 8 ones

124

128

182

197

$700 + 90 + 1$

$100 + 90 + 7$

$100 + 70 + 9$

136

$100 + 60 + 4$

$100 + 60 + 3$

$100 + 30 + 6$

Read and write the numbers in the standard form.

$30 + 3$

$19 + 500$

$2 + 40 + 100$

fifty – five

2 ones + 1 hundreds

3 ones + 1 hundreds + 1

tens

You're up!

Read and complete the explanation.

total value expanded 121 20

When we write the number _____, what that number means is that we have the _____ of 100 + _____ + 1.

We have expanded the number to show the _____ of each of its digits.

When we expand a number to show the value of each digit, we are writing that number in _____ form.

Read and write the numbers.

one hundred + thirty + five = _____ + _____ + _____ = _____

one hundred + ninety + three _____ + _____ + _____ = _____

one hundred + fifty + three _____ + _____ + _____ = _____

one hundred + twenty + eight _____ + _____ + _____ = _____

one hundred + eighty + two _____ + _____ + _____ = _____

Numbers to 999

TAKE THE CHALLENGE

Read and answer as fast as you can.
Work with a friend – find the answer for each box.
You have 10 seconds to complete each line.

20-sec mental quiz				
Number	5 more	10 more	5 less	10 more
100	105	115	110	120
125				
150				
175				
200				

Look, read and spell 5 number words to a friend.

10 ten	60 sixty	600 six hundred	100 one hundred
20 twenty	70 seventy	700 seven hundred	200 two hundred
30 thirty	80 eighty	800 eight hundred	300 three hundred
40 forty	90 ninety	900 nine hundred	400 four hundred
50 fifty	100 one hundred	1000 one thousand	500 five hundred

Write the numbers as words.

Read and write the numbers.

Three hundred and seventy – nine

Six hundred and fifty – three

Nine hundred and eighty – seven

Four hundred and twelve

Five hundred and twenty – six

Eight hundred and thirty – one

Look, count and write the numbers in the boxes. There is one number you don't need.

305

230

320

154

263

272

Put the numbers in order. Start with the smallest ones.

252	512	625	652
_____	_____	_____	_____

625	266	662	552
_____	_____	_____	_____

376	737	535	773
_____	_____	_____	_____

195	76	237	45
_____	_____	_____	_____

Listen to your teacher and write the numbers. Then expand them.

Dictation!

H	T	O	Expanded Form
2	3	6	$200 + 30 + 6 = 236$
			_____ + _____ + _____ = _____
			_____ + _____ + _____ = _____
			_____ + _____ + _____ = _____
			_____ + _____ + _____ = _____
			_____ + _____ + _____ = _____

Look, count and write.

$11 + 10 =$ _____	$13 + 10 =$ _____		$13 + 11 =$ _____	$12 + 10 =$ _____

Read and draw lines.

- | | | |
|---|---|-------|
| 1. A number between 100 and 150. | • | • 328 |
| 2. A number smaller than 100. | • | • 755 |
| 3. A number between 300 and 400. | • | • 127 |
| 4. A number that has 6 tens. | • | • 162 |
| 5. A number that has 5 ones. | • | • 811 |
| 6. A number that has 6 hundreds. | • | • 95 |
| 7. A number that has 2 digits the same. | • | • 615 |

Write the value of the blue digit in each number.

- | | |
|-------------|-------------|
| 48 = _____ | 133 = _____ |
| 226 = _____ | 193 = _____ |
| 834 = _____ | 661 = _____ |
| 59 = _____ | 943 = _____ |

Read and answer the questions.

In a public telephone booth, 243 calls are made before noon and 389 calls are made after noon.

Find the number of calls made in a day.

The balloon vendor at the circus sold three hundred forty-four balloons last week. He sold 303 balloons this week.

How many balloons did he sell in both weeks?

In a candy taste test, five hundred seventy-nine children said that they preferred orange candy, while 246 children said they preferred the strawberry ones.

How many children participated in the test?

You're up!

Find the words for the numbers.

UNIT 2 Subtraction

TAKE THE CHALLENGE

Read and answer the question.

There is a new kennels in the city.

It can hold 91 dogs.

At this moment, 67 dogs are taken care of.

How many more dogs can be brought here?

Read and complete the example.

You can use a number line to find out the difference between two numbers.

Example:

What's the difference between 3 and 16?

Count from 3 to 16 to find out.

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20
---	---	---	---	---	---	---	---	---	----	----	----	----	----	----	----	----	----	----	----

The difference between 3 and 16 is _____.

Counting from 3 to 10 is _____.

Counting from 10 to 16 is _____.

Counting from 3 to 12 is _____.

Counting from 10 to 15 is _____.

Use the number line to find the difference between the numbers.

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20
---	---	---	---	---	---	---	---	---	----	----	----	----	----	----	----	----	----	----	----

a) Counting from 14 to 16 is _____. b) Counting from 11 to 18 is _____.

c) Counting from 8 to 14 is _____. d) Counting from 7 to 13 is _____.

Use the number table to answer these. This time, count backwards.

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20
---	---	---	---	---	---	---	---	---	----	----	----	----	----	----	----	----	----	----	----

b) $13 - 6 = \dots\dots\dots$ c) $20 - 5 = \dots\dots\dots$

a) $12 - 4 = \dots\dots\dots$

d) $15 - 7 = \dots\dots\dots$ e) $19 - 0 = \dots\dots\dots$ f) $14 - 10 = \dots\dots\dots$

Look and find the difference between the pairs of numbers. Then draw lines to match them with the correct basket.

1 15

8 17

7 19

1 32

Look, read and practise.

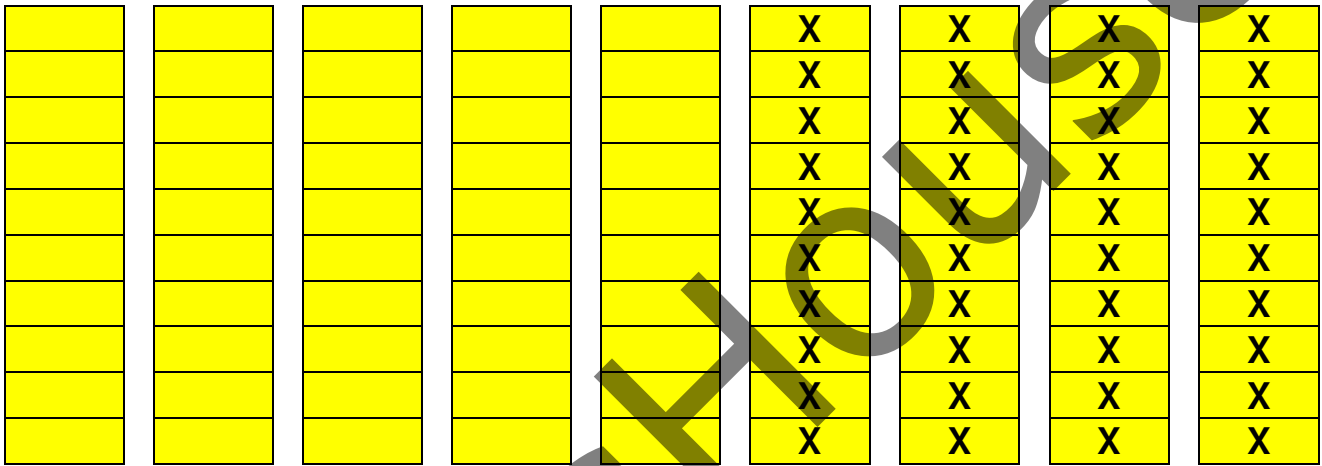

Subtracting (tens)

$$9 - 4 = 5$$

$$9 \text{ tens} - 4 \text{ tens} = 5 \text{ tens}$$

$$90 - 40 = 50$$

Answer these.

a) $4 - 2 = \underline{\quad}$
 $40 - 20 = \underline{\quad}$

b) $6 - 3 = \underline{\quad}$
 $60 - 30 = \underline{\quad}$

c) $7 - 5 = \underline{\quad}$
 $70 - 50 = \underline{\quad}$

d) $9 - 1 = \underline{\quad}$
 $90 - 10 = \underline{\quad}$

Look and count to answer the subtractions.

“Cross out squares - if necessary.”

a)

$$\underline{\quad\quad} - 30 = \underline{\quad\quad}$$

b)

$$\underline{\quad\quad} - 20 = \underline{\quad\quad}$$

c)

$$\underline{\quad\quad} - 60 = \underline{\quad\quad}$$

d)

$$\underline{\quad\quad} - 30 = \underline{\quad\quad}$$

Read, look and complete.

Subtracting (tens – units)

Break up numbers into tens and units.

Example:

$$28 - 3 = 25 \quad 20 + 8 - 3 = 20 + 5 = 25$$

This can also be written in columns:

$\begin{array}{r} \text{T} \quad \text{U} \\ 28 \\ - 3 \\ \hline 25 \end{array}$	<p>Subtract the units</p> <p>Subtract the tens</p>	$\begin{array}{r} 8 - 3 = 5 \\ 20 - 0 = 20 \\ \hline 25 \end{array}$
--	--	--

Complete these.

Example:

$28 - 3 = 25$

$20 + 8 - 3 = 25$

c) $26 - 3 = \underline{\quad}$

$20 + \underline{\quad} - 3 = \underline{\quad}$

a) $36 - 4 = \underline{\quad}$

$30 + \underline{\quad} - 4 = \underline{\quad}$

d) $48 - 6 = \underline{\quad}$

$40 + \underline{\quad} - 6 = \underline{\quad}$

b) $45 - 2 = \underline{\quad}$

$40 + \underline{\quad} - 2 = \underline{\quad}$

e) $39 - 4 = \underline{\quad}$

$30 + \underline{\quad} - 4 = \underline{\quad}$

Answer these.

a) $35 - 3 = \underline{\quad}$

b) $27 - 5 = \underline{\quad}$

c) $39 - 7 = \underline{\quad}$

a)
$$\begin{array}{r} 37 \\ - 5 \\ \hline \end{array}$$

b)
$$\begin{array}{r} 49 \\ - 4 \\ \hline \end{array}$$

c)
$$\begin{array}{r} 25 \\ - 2 \\ \hline \end{array}$$

a) $47 - \underline{\quad} = 41$

b) $39 - \underline{\quad} = 32$

c) $25 - \underline{\quad} = 21$

Read and complete.

Subtracting (tens / units – tens)

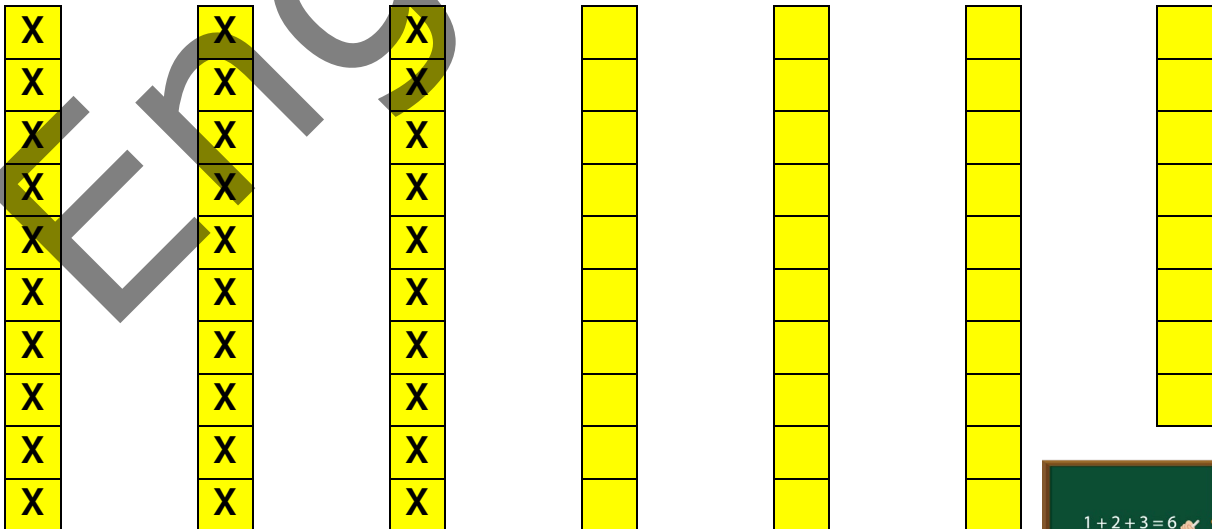

This example shows how you can do it with bars.

$68 - 30 = 38 \quad \checkmark$

Break up the number: $68 = \underline{\quad} + 8$

Subtract 30 from 60: $60 - 30 = \underline{\quad}$

Now add 8 to 30: $30 + 8 = \underline{\quad} \quad \checkmark$

Answer these.

a) $45 - 10 =$ _____

b) $36 - 20 =$ _____

c) $47 - 30 =$ _____

This example shows you how you can do it in columns:

$$\begin{array}{r} \text{T} \quad \text{U} \\ 6 \quad 8 \\ - 3 \quad 0 \\ \hline 3 \quad 8 \end{array}$$

Subtract
the units.
Subtract
the tens.

$$\begin{array}{r} 8 \quad - \quad 0 \quad = \quad 8 \\ 60 \quad - \quad 30 \quad = \quad 30 \\ \hline 38 \end{array}$$

Answer these.

a)
$$\begin{array}{r} 3 \quad 1 \\ - 1 \quad 0 \\ \hline \end{array}$$

b)
$$\begin{array}{r} 7 \quad 7 \\ - 5 \quad 0 \\ \hline \end{array}$$

c)
$$\begin{array}{r} 5 \quad 9 \\ - 3 \quad 0 \\ \hline \end{array}$$

d)
$$\begin{array}{r} 8 \quad 8 \\ - 5 \quad 0 \\ \hline \end{array}$$

e)
$$\begin{array}{r} 6 \quad 6 \\ - 3 \quad 0 \\ \hline \end{array}$$

f)
$$\begin{array}{r} 9 \quad 1 \\ - 4 \quad 0 \\ \hline \end{array}$$

You're up!

Subtract to the numbers in each set the number that is in each star.

a) 68

= _____

b) 72

= _____

c) 45

= _____

d) 66

= _____

e) 57

= _____

a) 89

= _____

EnglishHouse

Grouping and multiplying

TAKE THE CHALLENGE

Read and answer the question.

Mr Brown likes to visit hospitals and give books to the people who are sick.

He has 90 books left in his home. He has 10 more hospitals to visit. He will give out the same number of books in each hospital.

How many books will he give out in each hospital?

Read and complete.

Making groups

An easy way to count things is making groups of a specific number of objects.

Example:

How many marbles are in each group? _____

How many groups are there? _____

How many marbles are in total? _____

_____ groups of _____ make _____

Look, count and write numbers.

_____ groups of 3 make _____

_____ groups of 2 make _____

_____ groups of 4 make _____

_____ groups of 2 make _____

_____ groups of 3 make _____

Read and complete.

Multiplications

You can express multiplications in different forms.

Example:

4 multiplied by 5 = _____ 5 times 4 = _____ $5 \times 4 =$ _____

$4 + 4 + 4 + 4 + 4 =$ _____

"X" is called "times" in multiplications.

Count the groups to help you multiply.

$2 + 2 + 2 =$ _____
3 times 2 = _____

$4 + 4 + 4 =$ _____
3 times 4 = _____

Look, group and complete.

$$3 + 3 + 3 = \underline{\quad}$$

$$3 \text{ times } 3 = \underline{\quad}$$

$$2 + 2 + 2 + 2 = \underline{\quad}$$

$$2 \text{ times } 4 = \underline{\quad}$$

Answer these.

a) $4 + 4 + 4 + 4 + 4 + 4 =$ $4 \times 6 =$ _____

b) $5 + 5 + 5 + 5 =$ $5 \times 4 =$ _____

c) $6 + 6 + 6 =$ $6 \times 3 =$ _____

Draw ice cream cones to match the numbers and answer the multiplication.

$3 \times$ _____ $=$ _____

2

+

2

+

2

You're up!

Look and complete the sentences. Then write the names of the items next to the totals.

There are _____ groups of _____ backpacks.

T _____ a _____ g _____ o _____ .

T _____ a _____ g _____ o _____ f _____ .

T _____ a _____ g _____ o _____ c _____ .

Totals:

8: _____

20: _____

6: _____

9: _____

Array

TAKE THE CHALLENGE

Read and answer the question.

Marcus and his mum are preparing cups of hot chocolate. They are putting 8 marshmallows in each cup.

How many marshmallows do they need for 9 cups?

Read and complete.

This is another way in which you can express a multiplication.

Example:

4 multiplied by 2 = _____

4 times 2 = _____

4 X 2 = _____

As you can see, 4 X 2
has the same result as
2 X 4.

Draw dots and group them to illustrate these multiplications.

$4 \times 5 = \underline{\quad}$

$5 \times 4 = \underline{\quad}$

Look and count. Then write the multiplication that the dots are expressing.

a)

b)

c)

d)

e)

Read and complete.

Multiplication (1 and 0)

Any number multiplied by 1 stays the same.

Any number multiplied by 0 is 0.

- a) $1 \times \underline{\quad} = 9$ b) $\underline{\quad} \times 4 = 4$
c) $5 \times \underline{\quad} = 5$ d) $2 \times \underline{\quad} = 0$
e) $3 \times \underline{\quad} = 0$ f) $4 \times 0 = \underline{\quad}$
g) $7 \times \underline{\quad} = 7$ h) $1 \times \underline{\quad} = 0$

Colour blue the multiplications that have 0 as an answer. Then join the others with their matching result.

1 X 1 0 X 9 6 X 1 5 X 0

3 X 0

7 X 1

0 X 6

8 X 1

4 X 1

1 X 0

5 X 1

3 X 1

9 X 1

2 X 1

5 X 0

1 2 3

4 5 6

7 8

9

You're up!

Read and choose the correct definition. Then explain the concept in your own words.

Array: _____

a) To put a group of things in a particular way or order.

b) To put things in position

Array means: _____

Look and circle to array the items.

3 X 8

7 X 4

Let's check out

TAKE THE CHALLENGE

Read and find the secret word.

1 st	2 nd	3 rd	4 th	5 th

- The last letter of the secret word is the same letter that comes at the end of each day of the week.
- The second letter of the secret word is the second vowel in a word that sounds like pear.
- The third letter of the secret word is the silent letter in a four-letter word that means to chat or speak.
- The first letter of the secret word is the first letter in both words that sound like cent.
- The fourth letter of the secret word matches the third letter.

• Read and complete.

Adding

These are some adding strategies you can use

Near doubles:

$8 + 8 = \underline{\quad}$ --- $8 + 9$ (is one more) = $\underline{\quad}$

Counting on:

$2 + 5$ is the same result as $5 + \underline{\quad}$.

Crossing 10 by steps:

a) $7 + \underline{3} + 2 \longrightarrow 7 + 5 = \underline{\quad}$

b) $\underline{7} + 3 + 2 \longrightarrow 10 + 2 = \underline{\quad}$

Answer these.

Near doubles

a) $8 + 8 =$ _____

b) $5 + 5 =$ _____

c) $3 + 3 =$ _____

$8 + 9 =$ _____

$5 + 6 =$ _____

$3 + 4 =$ _____

Counting on

$6 + 3$ is the same result as _____.

$4 + 5$ is the same result as _____.

$3 + 4$ is the same result as _____.

$7 + 3$ is the same result as _____.

Crossing 10 by steps

a) $8 + \underline{4} + 2$ $8 + 6 =$ _____

$\underline{8} + 4 + 2$ $12 + 2 =$ _____

b) $9 + \underline{5} + 3$ $9 +$ _____ $=$ _____

$\underline{9} + 5 + 3$ _____ $+ 3 =$ _____

c) $7 + \underline{5} + 4$ $7 +$ _____ $=$ _____

$\underline{7} + 5 + 4$ _____ $+ 4 =$ _____

• **Read and complete.**

Multiplication (2 and 4 times table)

The numbers in the 4 times table are double the numbers in the 2 times table.

a) $2 \times 2 = 4$ double $4 \times 2 = 8$ b) $2 \times 6 = 12$ double $4 \times 6 = 24$

• **Complete these.**

a) $2 \times 9 = \underline{\quad}$ b) $2 \times 8 = \underline{\quad}$ c) $2 \times 3 = \underline{\quad}$
 $4 \times 9 = \underline{\quad}$ $4 \times 8 = \underline{\quad}$ $4 \times 3 = \underline{\quad}$
d) $2 \times 7 = \underline{\quad}$ e) $2 \times 6 = \underline{\quad}$
 $4 \times 7 = \underline{\quad}$ $4 \times 6 = \underline{\quad}$

• **Look and circle.**

Circle the numbers of the 2 times table with purple.
Circle the numbers in the 4 times table with orange.
You will have to circle some numbers twice.
There are some numbers that you don't have to circle.

11	40	2	28	14
12	18	3	21	32
38	9	16	12	22
10	35	2	24	8
4	36	20	6	15

Read and complete.

Multiplication (3 times table)

You can use the same method to work with the 3 times table.

a) $3 \times 5 = \underline{\quad}$

b) $3 \times 4 = \underline{\quad}$

c) $3 \times 8 = \underline{\quad}$

$5 \times 3 = \underline{\quad}$

$4 \times 3 = \underline{\quad}$

$8 \times 3 = \underline{\quad}$

d) $3 \times 9 = \underline{\quad}$

e) $3 \times 10 = \underline{\quad}$

$9 \times 3 = \underline{\quad}$

$10 \times 3 = \underline{\quad}$

Look and write the missing numbers.

3	9		15
	21		27
33		39	45

- Read and look. Then write the missing numbers.

Multiplication (5 and 10 times table)

The 5 and 10 multiplication tables are very easy because they are counted 5 by 5 and 10 by 10.

a)

5		15					
---	--	----	--	--	--	--	--

b)

		30		50	60		80
--	--	----	--	----	----	--	----

c)

20	25						55
----	----	--	--	--	--	--	----

d)

	10		20			35	
--	----	--	----	--	--	----	--

e)

45	40			25			
----	----	--	--	----	--	--	--

Answer these.

a) $5 \times 9 = \underline{\quad}$ b) $10 \times 9 = \underline{\quad}$ c) $10 \times 8 = \underline{\quad}$ d) $5 \times 5 = \underline{\quad}$

e) $5 \times 7 = \underline{\quad}$ f) $10 \times \underline{\quad} = 30$ g) $5 \times \underline{\quad} = 15$ h) $10 \times \underline{\quad} = 20$

i) $10 \times \underline{\quad} = 100$ j) $\underline{\quad} \times 7 = 70$

You're up!

Read and colour to match the boxes that have a number, the number as a word and its double in numbers.

four	eighteen	18	ten
10	twenty-one	4	5
12	twenty-five	five	21
36	42	18	25
8	20	nine	six

UNIT 3 Functions and equations – addition and subtraction

TAKE THE CHALLENGE

Read and answer the question.

Anna and Tom are serving soup. They have to serve thirty-one plates.

Anna goes to the bathroom to brush her hair, meanwhile Tom serves seventeen plates.

How many plates does Anna have to serve to complete the thirty-one plates?

Read and complete.

You can use the numbers given in a trio to guess the missing number.

You just have to make a different operation.

Ex. 1.

$$? - 4 = 9$$

$$4 + 9 = \underline{\quad}$$

So $13 - 4 = \underline{\quad}$

Ex. 2.

$$8 + ? = 11$$

$$11 - 8 = \underline{\quad}$$

So $8 + 3 = \underline{\quad}$

Answer these.

a) $8 + ? = 12$

$12 - 8 = \underline{\quad}$

$8 + \underline{\quad} = 12$

c) $? - 11 = 2$

$11 + 2 = \underline{\quad}$

$\underline{\quad} - 11 = 2$

b) $7 + ? = 10$

$10 - 7 = \underline{\quad}$

$7 + \underline{\quad} = 10$

d) $4 + ? = 9$

$9 - 4 = \underline{\quad}$

$4 + \underline{\quad} = 9$

Complete the addition grids.

a)

+	0	5	3
5			
15			
4			

b)

+	7	8	9
6			
8			
10			

Write the missing numbers.

a)

+	3		10
5	8	10	
	15	17	
15			25

b)

+		4	
6	9		14
		12	
15		19	

Multiplication tables

Read and answer the question.

Roger started to save ninety-two pesos every month. He does this since June of 2016.

How much money will he have in February of 2017?

Read and complete.

You may know that the order of the multiplication does not matter.

$$3 \times 2 = \underline{\quad} \text{ and } 2 \times 3 = \underline{\quad}$$

Take a look at the table and write the missing numbers. Then look for the same results and write some examples.

X	0	1	2	3	4	5
2	0		4		8	10
3	0			9		
4	0		8		16	20
5	0		10		20	

Ex. 1.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad} \quad \text{and} \quad \underline{\quad} \times \underline{\quad} = \underline{\quad}$$

Ex. 2.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad} \quad \text{and} \quad \underline{\quad} \times \underline{\quad} = \underline{\quad}$$

Complete the multiplications.

a)
$$\begin{array}{r} 4 \\ \times 2 \\ \hline \end{array}$$

b)
$$\begin{array}{r} 3 \\ \times 6 \\ \hline \end{array}$$

c)
$$\begin{array}{r} 5 \\ \times 4 \\ \hline \end{array}$$

d)
$$\begin{array}{r} 3 \\ \times 3 \\ \hline \end{array}$$

e)
$$\begin{array}{r} 7 \\ \times 2 \\ \hline \end{array}$$

Complete these.

a) $3 \times 4 = \underline{\quad}$

b) $3 \times 10 = \underline{\quad}$

c) $4 \times 6 = \underline{\quad}$

d) $2 \times 1 = \underline{\quad}$

e) $2 \times 6 = \underline{\quad}$

f) $2 \times 10 = \underline{\quad}$

g) $3 \times 5 = \underline{\quad}$

h) $6 \times 4 = \underline{\quad}$

Equalities and inequalities

Read and complete the text using the words in the box.

more

side

An

has

than

_____ equality expresses that one side _____ the same number as the other side. An inequality expresses that one side has _____ or has less _____ the other _____.

Look at the symbols and then look at the examples.

The symbol " $=$ "

The symbol " $<$ "

The symbol " $>$ "

Complete these putting in the correct symbol $<$, $>$ or $=$.

a) $8 + 8$ ___ 16 b) $10 - 2$ ___ 9 c) $3 + 5$ ___ 11 d) $11 - 5$ ___ 6

Colour the pair of stars that show calculations that are equal to each other.

Use different colours.

There is one example.

$7 + 3$

$10 + 6$

$2 + 2$

$8 - 2$

$6 + 6$

$14 - 4$

$5 + 5$

$12 - 2$

$8 + 8$

$9 - 3$

$6 - 2$

$8 + 4$

Look and put a tick if the math statement is correct. If it is not correct, put a cross.

a) $7 + 3 = 5$ _____ b) $9 - 7 < 4$ _____

c) $13 + 1 < 16$ _____ d) $3 + 9 < 15$ _____

e) $5 - 1 > 6$ _____ f) $8 - 2 = 6$ _____

You're up!

Play and write.

Roll the dice!

Get two dice (different colour).

Roll the dice and write the 2 numbers. Then write the correct sign in the circle. ">," "<," or "=".

Function machines

TAKE THE CHALLENGE

Read and answer the question.

Louis goes to the cinema to watch a movie. When the movie starts, there are twenty-five people. At the end of the movie, there are forty-two people.

How many people came in to the cinema during the movie?

Read and complete.

This is an adding machine. The number that goes IN is added with the number inside; the number that comes OUT is the result.

If the number goes backwards through the machine, the (+) becomes (-).

4 goes in the machine and _____ comes out ($4 + 2 = \underline{\quad}$).

Backwards, 6 goes in the machine and _____ comes out ($6 - 2 = 4$).

Complete the tables to show the numbers that go out.

IN	3	10	4	1	2
OUT	9				

IN	10	12	9	14	16
OUT	18				

IN	7	8	11	9	5
OUT	11				

Complete the tables to show the numbers that go in.

IN	2				
OUT	13	15	21	18	12

IN	3				
OUT	12	11	14	18	20

IN	10				
OUT	5	8	7	11	6

You're up!

Count and write.

_____ + _____ = _____

_____ + _____ = _____

_____ + _____ = _____

_____ + _____ = _____

_____ + _____ = _____

_____ + _____ = _____

Each shape stands for a number. The numbers shown are the result of each line, draw shapes to match the results.

Fractions

TAKE THE CHALLENGE

Read and answer the question.

Paul has a rectangular pizza. How can he divide it in order to give two slices to each of his two friends and two slices for him?

Read and complete.

You can divide objects into even parts. This way, you obtain fractions.

You can divide the whole in different forms, but all the parts must be the same.

A quarter is expressed like $1/4$. Four quarters make a whole.

The number on top is the numerator, it expresses the shaded parts.

The number at the bottom is the denominator. It expresses the equal parts in which the shape has been divided.

Look and write $\frac{1}{2}$. If a shape has not been divided this way, cross it out.

a)

b)

c)

d)

e)

f)

g)

h)

Which of these shapes has exactly $\frac{1}{4}$ shaded grey?

a)

b)

c)

d)

- Look for the shapes divided into halves and colour $\frac{1}{2}$ green. Look for the shapes divided into quarters and colour $\frac{1}{4}$ pink.

a)

b)

c)

d)

e)

f)

Halves of amounts

Read and answer the question.

Jim has eleven coloured pencils, his friend Tom has thirteen coloured pencils, Anne has nine coloured pencils and Charly has seven coloured pencils. They are going to work in pairs and divide the colours into even parts. How many colours will each pair have?

Read and complete.

To find the half of something, you have to divide it into two equal groups, and then just count one group.

Twelve apples

Two equal groups

$\frac{1}{2}$ of 12 is _____

Find the halves - the objects are already divided into two groups.

$\frac{1}{2}$ of 6 is _____

$\frac{1}{2}$ of 16 is _____

Divide the objects into two groups. Then count one group and write the half of the objects.

$\frac{1}{2}$ of 6 is _____

$\frac{1}{2}$ of 12 is _____

$\frac{1}{2}$ of 14 is _____

Read and draw.

Imagine that you have a chocolate bar and you want to share it with seven of your friends.

How can you divide it to give your friends equal parts?

Remember, you will also get a piece of it.

Read and colour.

A fraction is named according to the number of parts it represents or according to the number of parts it has been divided into.

Thirds
 $1/3$ is one part

Sixth
 $1/6$ is one part

Eighth
 $1/8$ is one part

Draw lines to join the figures with the fractions.

Half

Third

Quarter

Fifth

Sixth

Draw lines in the shapes to match the number of parts. Then match them with the correct names.

Number tracks

Read and answer the question.

There are thirty-six students in a music class. $\frac{1}{4}$ of that class likes rock music.

How many students like rock?

Write or draw your method.

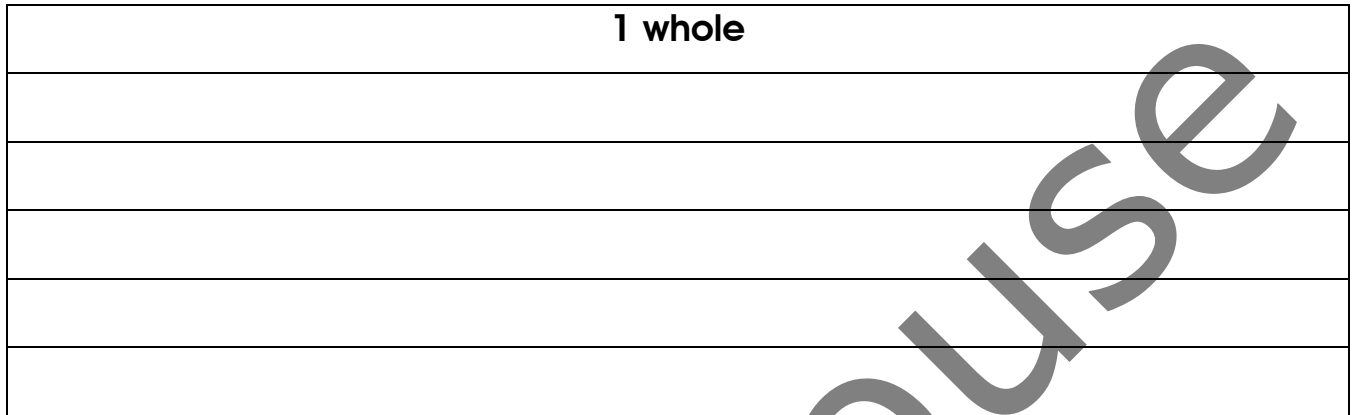

You can use a Fraction Wall to see how a whole can be divided into many parts.

Look and divide the Fraction Wall into the fractions in the box.

$\frac{1}{4}$	$\frac{1}{3}$	$\frac{1}{2}$	$\frac{1}{8}$	$\frac{1}{6}$
---------------	---------------	---------------	---------------	---------------

Write the fraction shown on each track.

a)

b)

c)

d)

e)

You're up!

Look at the rectangle pizzas and write.

1. **This is one whole unit.** How much of it does the customer want?

2. **This is one whole unit.** How much of it does the customer want?

3. **This is one whole unit.** How much of it does the customer want?

Time - o' clock

TAKE THE CHALLENGE

Read and answer the question.

Kelly wants to go to a concert that starts at three o'clock pm. She makes 2 hours to get to the concert by bus.

At what time does she have to leave to get to the concert on time?

The circular clock has a small arrow which is the "hour hand" and it has a long arrow which is the "minute hand."

When the minute hand points at 12, it is o'clock.

On a digital clock, the left side shows the hour and the right side shows the minutes past the hour.

Write the times shown on the clocks.

a)

___ o'clock

b)

___ o'clock

c)

___ o'clock

Write the times shown on the clocks in the digital form.

a)

___ : ___

b)

___ : ___

c)

___ : ___

Half past

Read and answer the question.

Robert has a soccer game after school on Friday. His classes finish at one pm. What time is the soccer game if it starts one hour and a half after school?

Read and complete.

There are 60 minutes in an hour.
30 minutes are the half-way to complete the hour.
It is half past five.
It is half past _____.
It is half past _____.

Write the times in the digital form.

a)

b)

c)

d)

Draw lines to join the clocks that have the same times.

1:30

3:30

6:30

4:30

9:30

Quarters

Read and answer the question.

Ricky waits for his turn to play videogames. His cousins play by turns of a quarter of an hour. If they started to play at four o'clock and he has three cousins, at what time is his turn?

There are 60 minutes in an hour; a quarter is one fourth of those minutes (15 minutes).

Quarter
past the hour
4:15

Quarter
to the next hour
4:45

"Quarter past" means 15 minutes after the hour.

"Quarter to" means 15 minutes to the next hour (forty-five minutes past the hour).

Write the times using quarter past or quarter to.

12:15

It is _____

It is _____

8:15

It is _____

It is _____

2:15

It is _____

It is _____

Draw and write the later time for each clock.

1 hour later

12:00

___ : ___

2 hours later

30 minutes later

3:00

___ : ___

15 minutes later

15 minutes later

2:30

___ : ___

30 minutes later

1 hour 30 minutes later

4:00

___ : ___

45 minutes later

You're up!

Look and label the hands of the clock.

Look and label the examples shown on the clocks.

O'clock

Quarter to

Quarter past

Half past

UNIT 4 Shapes – flat shapes

TAKE THE CHALLENGE

Read, draw and write.

Look around your classroom and draw some things that have a specific shape. Then write what item it is and what shape it has.

.....
.....

.....
.....

.....
.....

.....
.....

.....
.....

.....
.....

Use the words in the box to label the shapes. Then answer the questions with a friend.

circle square triangle rectangle

- How are these flat shapes similar?
- How are they different?

Write the shape letter in the correct section to complete the chart.

square	triangles	circles	rectangles

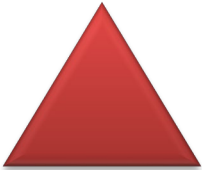

$$4(4x) + 2(x) = 72$$

$$x = ?$$

You're up!

Look and write the information about the shapes.

Image				
Name				
Number of corners				
Number of sides				
Real life example				

Solid shapes

TAKE THE CHALLENGE

Read, draw and write.

Look around your classroom and draw the objects in which you can find a solid shape and name them.

For example, your pencil case has a cuboid shape.

Pencilcase
Cuboid

.....
.....

.....
.....

.....
.....

$$4(4x) + 2(x) = 72$$
$$x = ?$$

Look and say the words. Then answer the questions with a friend.

- How are these solid shapes similar?
- How are they different?

Sphere

Cone

Cube

Pyramid

Cylinder

Cuboid

Write the name of each shape.

a)

b)

c)

d)

e)

f)

Look and cross out the odd shape.

1

2

3

4

When you are comparing solid shapes, look at their properties: faces, edges and vertices.

Use the words to label the shapes.

face

edge

vertex

A cylinder has a curved face and two flat faces.

Look at a model cube and a triangle. Describe the shapes to a friend. Then complete these.

a) A cube has edges.

b) A cube has vertices.

c) A cube has faces.

d) Is this the same for a cuboid?

e) A triangle has edges.

f) A triangle has vertices.

g) A triangle has faces.

h) Is this the same for a cone?

You're up!

Read the descriptions and draw the shapes. Then use the words to label them.

Cube

Cylinder

Cuboid

Sphere

Pyramid

Cone

a) It is shaped like a round ball.

b) It has a flat, round or oval base and a top in the form of a point.

c) It has six square sides of equal size.

d) It has a flat square base and four flat triangular sides – the sides meet to form a point at the top.

e) It is a tube with long sides and two circular ends the same size.

f) It has six rectangular sides.

Comparing and ordering to 999

Read and answer the questions.

Jake has a collection of toy cars. He has 356 toy cars. His friend Mike has a collection of fiction cards, he has 713 cards. Anna has a collection of dolls, she has 499 dolls.

Who has the biggest collection?

Who has the smallest collection?

What's the difference in number between Anna's collection and Jake's collection?

What's the difference between Jake's collection and Mike's collection?

When you need to compare numbers, you have to look carefully at the digits. You can break them into units, tens and hundreds.

356

499

713

$$300 + 50 + 6 \quad 400 + 90 + 9 \quad 700 + 10 + 3$$

700 is greater than 400 and 300, so 713 is greater than 499 and 356.
 400 is greater than 300, so 499 is greater than 356.

Read and compare. Then write the smaller numbers on the lines.

a)	273	628
b)	911	182
c)	437	659
d)	839	855

Put the numbers above in order. Start with the smallest.

.....

.....

Work in groups of 6. Write a number between 200 and 999 in your notebook. Tell your friends what number you wrote, compare the numbers and write the smallest number on the first line and the biggest one on the last line. Then put the rest of the numbers in order.

Round 1

.....

.....

Round 2

.....

.....

You're up!

Look and write.

10 more	
360	370
715	
840	
455	
800	
625	

10 less	
240	250
	555
	340
	295
	730
	915

Adding and subtracting – 999

TAKE THE CHALLENGE

Read and answer the questions.

Jake wants to put his collection of 356 toy cars with Tim's collection of 212 toy cars.

How many toy cars do they have together?

How many more cars does Jake have in his collection?

To add or subtract 3-digit numbers, you can break them into hundreds, tens and units.

356 and 212

Break them up

$$\begin{array}{r} 356 \\ + 212 \\ \hline 568 \end{array}$$

$$\begin{array}{r} 300 + 50 + 6 \\ + 200 + 10 + 2 \\ \hline 500 + 60 + 8 \end{array}$$

Break them up

$$\begin{array}{r} 356 \\ - 212 \\ \hline 144 \end{array} \quad \begin{array}{r} 300 + 50 + 6 \\ - 200 + 10 + 2 \\ \hline 100 + 40 + 4 \end{array}$$

It is very important to know that you have to add the units first, then the tens and, at the end, the hundreds.

In subtraction, you do it in the same order.

Answer these.

$$\begin{array}{r} 167 \\ + 821 \\ \hline \end{array} \quad \begin{array}{r} 616 \\ - 213 \\ \hline \end{array} \quad \begin{array}{r} 558 \\ - 440 \\ \hline \end{array} \quad \begin{array}{r} 672 \\ + 200 \\ \hline \end{array} \quad \begin{array}{r} 709 \\ + 290 \\ \hline \end{array}$$

Write the missing numbers.

$$\begin{array}{r} 7 \dots 1 \\ + 112 \\ \hline \end{array} \quad \begin{array}{r} 262 \\ + 43 \dots \\ \hline \end{array} \quad \begin{array}{r} 968 \\ - \dots 1 \dots \\ \hline \end{array} \quad \begin{array}{r} \dots 6 \dots \\ + 8 \dots 0 \\ \hline \end{array} \quad \begin{array}{r} \dots 7 \dots \\ - 221 \\ \hline \end{array}$$

$$\begin{array}{r} \dots 7 \dots \\ 6 \dots 8 \\ \hline \end{array} \quad \begin{array}{r} 8 \dots 6 \\ 995 \\ \hline \end{array} \quad \begin{array}{r} 7 \dots 6 \end{array}$$

Look at the numbers in the stars and complete the tables.

275	145	232	115	104	261
475					

900	400	756	812	592	737
500					

132	302	243	201	520	603
482					

You are up!

Look and write downwards.

Count by 10	Count by 10	Count by 100
ten		
	one hundred ninety	two hundred fifty

Word problems - multiplication

TAKE THE CHALLENGE

Read and answer the questions.

There are 7 swings in the playground. On each swing there are 3 children.

What is the total number of children? _____

How many children would be on 9 swings? _____

Multiplying numbers is very easy when you use a multiplication chart!

Look and complete.

X	1	2	3	4	5	6	7	8	9	10
1	1		3		5	6		8	9	
2	2		6		10		14	16		20
3		6		12		18			27	
4	4		12		20		28	32		40
5		10		20		30		40		
6	6			24		36	42		54	60
7		14	21		35			56		70
8	8		24	32	48	56				
9		18			45		63		81	90
10	10	20		40		60			90	

$4(4x) + 2(x) = 72$
 $x = ?$

Now that you know how to use the multiplication chart, it is time to work on multiplication word problems.

Example

Mark loves grapes. He usually eats 3 grapes per minute.

- How many grapes could he eat in 3 minutes?
- How many grapes could he eat in 5 minutes?
- How many grapes could he eat in 7 minutes?

In this example, the factors are 3 grapes (number of grapes he eats) and the minutes 2, 5 and 7.

Let's do the math. Use the multiplication chart on the previous page.

Number of grapes 3

Minutes \times 2

Number of grapes 3

Minutes \times 5

Number of grapes 3

Minutes \times 7

Mark eats 3 grapes in 1 minute.

Mark could eat grapes in minutes.

Mark could eat grapes in minutes.

Mark could eat grapes in minutes.

Read and write the information in the correct place. Then use the multiplication chart again to get the result.

Mr Angles bought a box of pencils for his class. The box has 6 pencils.

- How many pencils are there in 3 boxes?
- How many pencils are there in 6 boxes?
- How many pencils are there in 9 boxes?

In this example, the factors are (the number of in each) and the number of; and

Number of pencils	...	Number of pencils	...	Number of pencils	...
Boxes	X	Boxes	X	Boxes	X
	_____		_____		_____
	<input type="text"/>		<input type="text"/>		<input type="text"/>

There are 6 pencils in each box.

There are pencils in boxes.

There are pencils in boxes.

There are pencils in boxes.

Word problem 1

There are 5 bunches of oranges. Each bunch has 5 oranges.

How many oranges are there in all?

They are all together.

How many oranges are there in 7 bunches?

There are in bunches.

X
	<input type="text"/>

X
	<input type="text"/>

Word problem 2

Manuela eats 3 meals a day. How many meals does she eat in 3 days?

Manuela eats in days.

How many meals does she eat 5 days?

Manuela eats in days.

How many meals does she eat in a week? meals

.....
X

.....
X

Word problem 3

Martin has to build three robots for his science class. For one robot he used 1 block for the head, 4 blocks for the arms, 6 blocks for the legs and 2 blocks for the torso.

How many blocks does he need for the three robots?

- | | |
|----------------------|-----------------------|
| • Heads _____ blocks | • Arms _____ blocks |
| • Legs _____ blocks | • Torsos _____ blocks |

How many blocks did he use for 1 robot in total?

He used _____ blocks for 1 robot.

How many blocks did he use for the three robots in total?

He used _____ blocks for the three robots.

You're up!

Read and answer the questions.

A spider has 8 legs.

2 spiders have _____ legs.

3 spiders have _____ legs.

4 spiders have _____ legs.

5 spiders have _____ legs.

6 spiders have _____ legs.

7 spiders have _____ legs.

8 spiders have _____ legs.

9 spiders have _____ legs.

10 spiders have _____ legs.
